Independent Auditors' Report

City Council and Management
City of Standish
Standish, Michigan

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Standish, as of and for the year ended June 30, 2020, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as

evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Standish, as of June 30, 2020, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Adoption of New Accounting Standard

As described in Note 1 to the financial statements, during the year ended June 30, 2020, the City adopted GASB Statement No. 84 *Fiduciary Activities*. Our opinions are not modified with respect to this matter.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, budgetary comparison information, and Michigan Employees Retirement System schedules as identified in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information, because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City of Standish basic financial statements. The other supplementary information, as identified in the table of contents, is presented for purpose of additional analysis and is not a required part of the basic financial statements.

The other supplementary information, as identified in the table of contents, is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The other supplementary information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the other supplementary information, as identified in the table of contents, is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated August 25, 2020 on our consideration of the City of Standish internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of The City of Standish's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering City of Standish's internal control over financial reporting and compliance.

City of Standish
Management's Discussion and Analysis
Year Ended June 30, 2020

Our discussion and analysis of the City of Standish's financial performance provides an overview of the City's financial activities for the fiscal year ended June 30, 2020. Please read it in conjunction with the City's financial statements.

Financial Highlights

As discussed in further detail in this discussion and analysis, the following represents the most significant financial highlights for the year ended June 30, 2020.

Total net position related to the City's governmental activities is \$3,077,467. The unrestricted portions of net position are \$598,675.

Tax revenues, the City's largest revenue source, increased by approximately \$32,000 from 2019. This is representative of a significant increase in taxable value for those properties that were sold in the current year.

Using this Annual Report

This annual report consists of a series of financial statements. The statement of net position and the statement of activities provide information about the activities of the City of Standish as a whole and present a longer-term view of the City's finances. This longer-term view uses the accrual basis of accounting so that it can measure the cost of providing services during the current year, and whether the taxpayers have funded the full cost of providing governmental services.

The fund financial statements present a short term view; they tell us how the taxpayer's resources were spent during the year, as well as how much is available for future spending. Fund financial statements also report the City's operations in more detail than the government-wide financial statements by providing information about the City's most significant funds. The fiduciary fund statements provide financial information about activities for which the City acts solely as a trustee or agent for the benefit of those outside of the City.

City of Standish
Management's Discussion and Analysis
Year Ended June 30, 2020

The City of Standish as a Whole

The following table shows, in a condensed format, the statement of net position as of June 30, 2020 and 2019.

	Governmental Activities 2020	Governmental Activities 2019	Business-Type Activities 2020	Business-Type Activities 2019	Total 2020	Total 2019
Current assets	\$ 1,682,000	\$ 1,489,770	\$ 1,190,612	\$ 1,054,342	\$ 2,872,612	\$ 2,544,112
Capital assets	2,648,463	2,921,365	6,380,422	7,024,593	9,028,885	9,945,958
Deferred outflow of resources	43,249	79,138	91,908	168,168	135,157	247,306
Total assets and deferred outflows of resources	4,373,712	4,490,273	7,662,942	8,247,103	12,036,654	12,737,376
Current liabilities	18,234	131,916	27,111	18,636	45,345	150,552
Noncurrent liabilities	1,278,011	1,488,029	2,295,353	2,614,577	3,573,364	4,102,606
Total liabilities and deferred inflows of resources	1,296,245	1,619,945	2,322,464	2,633,213	3,618,709	4,253,158

City of Standish
Management's Discussion and Analysis
Year Ended June 30, 2020

Governmental Activities

Governmental activities revenue decrease nearly \$314,500 due to decreases in Saw Grant Reimbursements offset by property tax increases, and investment returns.

Business Type Activities

The City of Standish's business-type activities consist of Water Fund and Sewer Fund. The water and sewer funds are combined major funds.

The City provides treated water to the city residents. Raw water is purchased from Saginaw-Midland Water Supply System. The City also provides water to approximately 50 Standish and Lincoln Township customers. The City has revenue bonds and a general obligation bond debt for recent system wide improvements.

The City also provides municipal sanitary sewer to its residents.

City of Standish Funds

The fund financial statements provide detailed information about the most significant funds, not the City of Standish as a whole. The City Council creates funds to help manage money for specific purposes as well as show accountability for certain activities. The City's major governmental fund is the General Fund.

a) **General Fund**

Functions relating to the general governmental activities of the City, which are financed by property tax levies, by distribution of State revenues, and from fees charged for various municipal activities and services are recorded in the General Fund. The City Council's approved budget for the 2020 fiscal year included the use of a balanced budget. The City actually increased fund balance by \$178,351 to \$930,792 at year end.

b) **Major Street Fund**

Functions relating to the major street activities of the City, which are financed by Act 51 funds are recorded in the Major Street Fund. The City Council's approved budget for the 2020 fiscal year included the use of a balanced budget. The City actually increased fund balance by \$98,205 to \$493,952 at year end.

City of Standish
Management's Discussion and Analysis
Year Ended June 30, 2020

General Fund Budgetary Highlights

Over the course of the year, the City Council and City administration monitor and amend the budget to account for unanticipated events during the year. The most significant change was continued increasing benefit costs. Prudent budgeting and continued monitoring of all expenditures reduced the effect of these issues.

Capital Asset and Debt Administration

At the end of 2020 the City of Standish has \$9,028,885 invested in a wide range of capital assets, including land, buildings, equipment, computer equipment, and water and sewer lines. The value of the infrastructure assets, net of depreciation contained in this report, is \$1,599,046 at the end of 2020.

Debt reported in these financial statements is related to the construction of the above-mentioned infrastructure assets and buildings and is reported as a liability on the statement of net position.

Economic Factors and Next Year's Budgets and Rates

The City needs to continue to monitor its budget very closely. The state-wide Tax Reform Act limits growth in taxable value on any individual property to the lesser of inflation or 5 percent. Because some properties increase by less than inflation, the mathematical result of this is that the total taxable value for the City will grow less than inflation, before considering new property additions. State revenue-sharing payments increased this past year but has decrease in the past two years due to State cutbacks and less sales tax receipts at the State level. These factors, coupled with recent decreases from historical norms in other revenues, including charges for services and interest on investments, continue to have a concern on the City's ability to balance its budget.

Despite these concerns, the City will continue to operate as efficiently as possible in the next fiscal year. With a decreased amount of funds budgeted for general operations and the restructuring of employee benefits, the City is hopeful to offset the decrease in revenues that will continue to exist.

To encourage additional growth the City has taken advantage of all grant opportunities available. While a financial match is often required of the City for grant funded projects, the City has taken a fiscally responsible approach of ensuring adequate funds are available for such projects. In addition, the City has continued to view economic development as a primary focus. While economic concerns are often left behind in difficult financial times, the City has taken the approach that without ensuring a solid future tax base the tough times will only continue to exist.

Governmental Funds
Reconciliation of the Statement of Revenues, Expenditures and Changes in Fund Balances
of Governmental Funds to the Statement of Activities
For the Year Ended June 30, 2020

Net change in fund balances - Total governmental funds	\$	305,912
Total change in net position reported for governmental activities in the statement of activities is different because:		
Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense.		
Depreciation expense		(272,902)
Expenses are recorded when incurred in the statement of activities		
Compensated absences		(9,100)
The statement of net position reports the net pension liability and deferred outflows of resources and deferred inflows related to net pension liability and pension expense. However, the amount recorded on the governmental funds equals actual pension contributions.		
Net change in net pension liability		63,118
Net change in deferred outflow of resources related to net pension liability		(35,889)
Bond proceeds are reported as financing sources in the governmental funds and thus contribute to the change in fund balance. In the statement of net position, however, issuing debt increases long-term liabilities and does not affect the statement of activities. Similarly, repayment of principal is an expenditure in the governmental funds but reduces the liability in the statement of net position.		
Repayments of long-term debt		<u>156,000</u>
Change in net position of governmental activities	\$	<u>207,139</u>

City of Standish
Notes to the Financial Statements
June 30, 2020

Note 1 - Summary of Significant Accounting Policies

Reporting entity

City of Standish is governed by an elected seven-member Board. The accompanying financial statements present the government and its component units, entities for which the government is considered to be financially accountable. Although blended component units are legal separate entities, in substance, they are part of the government's operations. Each discretely presented component unit is reported in a separate column in the government-wide financial statements to emphasize that it is legally separate from the government (see discussion below for description).

Discretely Presented Component Units – The component unit column in the entity wide financial statements includes the financial data of the City's Downtown Development Authority and Building Authority. These units are reported in a separate column to emphasize that it is legally separate from the City. The members of the Governing Board of the Downtown Development Authority and Building Authority are appointed by the City. The budgets and expenditures of the Authorities must be approved by the City. The City also has the ability to significantly influence operations of the Authorities. The Authorities do not issue any other form of financial statements except as contained in the City of Standish annual financial statements.

Government-wide and fund financial statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the primary government and its component units. *Government activities*, which normally are supported by taxes and intergovernmental revenues, are reported separately from *business-type activities*, which rely to a significant extent on fees and charges for support. Likewise, the *primary government* is reported separately from certain legally separate *component units* for which the primary government is financially accountable.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segments are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. *Program revenues* include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

Measurement focus, basis of accounting, and financial statement presentation

The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*, as are the proprietary fund and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be *available* when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures

City of Standish
Notes to the Financial Statements
June 30, 2020

generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Property taxes, sales taxes, franchise taxes, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Only the portion of special assessments receivable due within the current fiscal period is considered to be susceptible to accrual as revenue of the current period. All other revenue items are considered to be measurable and available only when cash is received by the government.

The government reports the following major governmental funds:

The General Fund is the government's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

The Major Street Fund is for major street project resources and expenditures.

The government reports the following major proprietary funds:

The Sewer Fund accounts for the activities of the sewage collection system.

The Water Fund accounts for the activities of the water distribution system.

Additionally, the government reports the following:

The nonmajor special revenue funds account for the proceeds of specific revenue sources requiring separate accounting because of legal or regulatory provisions or administrative requirements.

Custodial Funds account for property tax and other deposits collected on behalf of other units and individuals.

As a general rule the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are payments-in-lieu of taxes where the amounts are reasonably equivalent in value to the interfund services provided and other charges between the government's water and sewer function and various other functions of the government. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Amounts reported as *program revenues* include 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as *general revenues* rather than as program revenues. Likewise, general revenues include all taxes.

Proprietary funds distinguish *operating* revenues and expenses from *nonoperating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the sewer and water funds are charges to customers for sales and services. The government also recognizes as operating revenue the portion of tap fees intended to recover the cost of connecting new customers to the system. Operating expenses for sewer and water funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

Assets, liabilities, and net position or equity

Cash and cash equivalents – The City's cash and cash equivalents include cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition.

City of Standish
Notes to the Financial Statements
June 30, 2020

Deposits and investments – Cash and cash equivalents are considered to be cash on hand, demand deposits, and short-term investments with a maturity of three months or less when acquired. Investments are stated at fair value based on quoted market price. Certificate of deposits are stated at cost which approximates fair value.

Receivables and payables – In general, outstanding balances between funds are reported as “due to/from other funds.” Activity between funds that is representative of lending/borrowing arrangement outstanding at the end of the fiscal year is referred to as “advances to/from other funds.” Any residual balances outstanding between the governmental activities and the business-type activities are reported in the government-wide financial statements as “internal balances.”

All trade and property tax receivables are shown as net of allowance for uncollectible amounts. Property taxes are levied on each July 1st on the taxable valuation of property as of the preceding December 31st. Taxes are considered delinquent on March 1st of the following year, at which time penalties and interest are assessed.

The 2019 taxable valuation of the government totaled \$40,706,287 on which ad valorem taxes consisted of 16.7242 mills for operating purposes and 1.2500 mills for sewer debt service. This resulted in approximately \$680,800 for operating expenses and \$50,900 for sewer debt service exclusive of any Michigan Tax Tribunal or Board of Review adjustments.

Prepaid items – Certain payments to vendors reflect costs applicable to future fiscal years. For such payments in governmental funds the City follows the consumption method, and they therefore are capitalized as prepaid items in both entity-wide and fund financial statements.

Capital assets – Capital assets, which include property, plant and equipment, are reported in the applicable governmental or business-type activities column in the government-wide financial statements. Capital assets are defined by the government as assets with an initial individual cost of more than \$5,000 and an estimated useful life in excess of two years. Such assets are recorded at historical cost or

estimated historical cost, if purchased or constructed.

The reported value excludes normal maintenance and repairs which are essentially amounts spent in relation to capital assets that do not increase the capacity or efficiency of the item or extend its useful life beyond the original estimate. In the case of donations the government values these capital assets at the estimated fair value of the item at the date of its donation.

Property, plant and equipment are depreciated using the straight-line method over the following useful lives:

Buildings	40 to 60 years
Building improvements	15 to 30 years
Water and sewer lines	50 to 75 years
Vehicles	3 to 10 years
Office equipment	5 to 7 years
Computer equipment	3 to 7 years

Deferred outflows of resources – The City reports deferred outflows of resources as a result of pension earnings. This amount is the result of a difference between what the plan expected to earn from plan investments and what is actually earned. This amount will be amortized over the next four years and included in pension expense. Changes in assumptions and experience differences relating to the net pension liability are deferred and amortized over the expected remaining services lives of the employees and retirees in the plan. The City also reported deferred outflows of resources for pension contributions made after the measurement date. This amount will reduce net pension liability in the following year.

Compensated absences – Full time regular employees will be credited with Paid Time Off hours each pay period earning no more than 288 hours per year. An employee can accrue up to 50 percent of his/her annual number of allocated hours for any given year; however, at no time shall the accrued balance exceed 432 hours except those who are unlimited based on negotiated contracts. All accumulated paid time off

City of Standish
Notes to the Financial Statements
June 30, 2020

is accrued when incurred in the government-wide and proprietary fund financial statements. A liability for these amounts is reported in governmental funds only for terminations as of year-end.

Long-term obligations – In the government-wide financial statements, and proprietary fund types in the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, and business-type activities in the statement of net position. Bond premiums and discounts are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of the applicable bond premium or discount.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

Fund equity – In the fund financial statements, governmental funds report fund balance in the following categories:

Non-spendable – amounts that are not available in a spendable form.

Restricted – amounts that are legally imposed or otherwise required by external parties to be used for a specific purpose.

Committed – amounts constrained on use imposed by the City's highest level of decision-making, its City Council. A fund balance commitment may be established, modified, or rescinded by a resolution of the City Council. The City does not have any committed fund balance at year end.

Assigned – amounts intended to be used for specific purposes, as determined by management. Residual amounts in governmental funds other than the general fund are automatically assigned by their nature. The City does not have any assigned fund balance at year end.

Unassigned – all other resources; the remaining fund balances after non-spendable, restrictions, commitments and assignments.

When an expenditure is incurred for purposes for which both restricted and unrestricted fund balance is available, the City is to consider restricted funds spent first.

When an expenditure is incurred for purposes for which committed, assigned, or unassigned amounts could be used, the City is to consider the funds to be spent in the following order: (1) committed, (2) assigned, (3) unassigned.

Contingent Liabilities

Amounts received or receivable from grant agencies are subject to audit and adjustment by grantor agencies, principally the federal government. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amount, if any, of expenditures that may be disallowed by the grantor cannot be determined at this time, although the government expects such amounts, if any, to be immaterial.

Adoption of New Accounting Standards

Statement No. 84, *Fiduciary Activities* improves the guidance regarding the identification of fiduciary activities for accounting and financial reporting purposes and how those activities should be reported. The criteria generally is on (1) is the government controlling the assets of the fiduciary activity and (2) the beneficiaries with whom a fiduciary relationship exists. The four fiduciary funds that should be reported, if applicable: (1) pension (and other employee benefit) trust funds, (2) investment trust funds, (3) private-purpose trust funds, and (4) custodial

City of Standish
Notes to the Financial Statements
June 30, 2020

funds. Custodial funds generally will report fiduciary activities that are not held in a trust or similar arrangement that meets specific criteria.

Statement No. 92, *Omnibus 2020* enhances comparability in accounting and financial reporting and improves the consistency of authoritative literature by addressing practice issues that have been identified during implementation and application of certain GASB Statements. This Statement addresses a variety of topics and includes specific provisions about the following: (1) The effective date of Statement No. 87, *Leases*, and Implementation Guide No. 2019-3, *Leases*, for interim financial reports (2) Reporting of intra-entity transfers of assets between a primary government employer and a component unit defined benefit pension plan or defined benefit other postemployment benefit (OPEB) plan. (3) The applicability of Statements No. 73, *Accounting and Financial Reporting for Pensions and Related Assets That Are Not within the Scope of GASB Statement 68*, and Amendments to Certain Provisions of GASB Statements 67 and 68, as amended, and No. 74, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, as amended, to reporting assets accumulated for postemployment benefits. (4) The applicability of certain requirements of Statement No. 84, *Fiduciary Activities*, to postemployment benefit arrangements. (5) Measurement of liabilities (and assets, if any) related to asset retirement obligations (AROs) in a government acquisition. (6) Reporting by public entity risk pools for amounts that are recoverable from reinsurers or excess insurers. (7) Reference to nonrecurring fair value measurements of assets or liabilities in authoritative literature. (8) Terminology used to refer to derivative instruments.

Statement No. 95, *Postponement of the Effective Dates of Certain Authoritative Guidance* provides temporary relief to governments and other stakeholders in light of the COVID-19 pandemic and provides postponement of effective dates for certain GASB Statements. This statement was effective upon issuance in May of 2020.

Upcoming Accounting and Reporting Changes

The Governmental Accounting Standards Board has released the following Statements.

Statement No. 87, *Leases* increases the usefulness of the financial statements by requiring recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. It establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset. A lessee will be required to recognize a lease liability and an intangible right-to-use a lease asset, and a lessor will be required to recognize a lease receivable and a deferred inflow of resources, thereby enhancing the relevance and consistency of information about leasing activities. The requirements of this Statement are effective for the fiscal year ending June 30, 2022.

Statement No. 89, *Accounting for Interest Cost Incurred before the End of a Construction Period* enhances the relevance and comparability of information about capital assets and the cost of borrowing for a reporting period and to simplify accounting for interest cost incurred before the end of a construction period. It requires that interest cost incurred before the end of a construction period be recognized as an expense in the period in which the cost is incurred for financial statements prepared using the economic resources measurement focus. As a result, interest cost incurred before the end of a construction period will not be included in the historical cost of a capital asset reporting in a business-type activity or enterprise fund. Interest cost incurred before the end of a construction period should be recognized as an expenditure for financial statements prepared using the current financial resources measurement. The requirements of this Statement are effective for the fiscal year ending June 30, 2022.

City of Standish
Notes to the Financial Statements
June 30, 2020

Statement No. 90, *Majority Equity Interests* improves the consistency and comparability of reporting a government's majority equity interest in a legally separate organization and improves the relevance of financial statement information for certain components. The requirements of this Statement are effective for the fiscal year ending June 30, 2021.

Statement No. 91, *Conduit Debt Obligations* provides a single method of reporting conduit debt obligations by issuers and eliminate diversity in practice associated with (1) commitments extended by issuers, (2) arrangements associated with conduit debt obligations, and (3) related note disclosures. This Statement achieves those objectives by clarifying the existing definition of a conduit debt obligation; establishing that a conduit debt obligation is not a liability of the issuer; establishing standards for accounting and financial reporting of additional commitments and voluntary commitments extended by issuers and arrangements associated with conduit debt obligations; and improving required note disclosures. This statement is effective for the year ending June 30, 2023.

Statement No. 93, *Replacement of Interbank Offered Rates* establishes accounting and financial reporting requirements related to the replacement of IBORs in hedging derivative instruments and leases. It also identifies appropriate benchmark interest rates for hedging derivative instruments. The requirements of this Statement apply to the financial statements of all state and local governments. This statement is effective for the year ending June 30, 2022.

Statement No. 94, *Public-Private and Public-Public Partnerships and Availability Payment Arrangements* improves financial reporting by addressing issues related to public-private and public-public partnership arrangements (PPPs). As used in this Statement, a PPP is an arrangement in which a government (the transferor) contracts with an operator (a governmental or nongovernmental entity) to provide public services by conveying control of the right to operate or use a nonfinancial asset, such as infrastructure or other capital asset (the underlying PPP asset), for a period of time in an exchange or

exchange-like transaction. Some PPPs meet the definition of a service concession arrangement (SCA), which the Board defines in this Statement as a PPP in which (1) the operator collects and is compensated by fees from third parties; (2) the transferor determines or has the ability to modify or approve which services the operator is required to provide, to whom the operator is required to provide the services, and the prices or rates that can be charged for the services; and (3) the transferor is entitled to significant residual interest in the service utility of the underlying PPP asset at the end of the arrangement. This Statement also provides guidance for accounting and financial reporting for availability payment arrangements (APAs). As defined in this Statement, an APA is an arrangement in which a government compensates an operator for services that may include designing, constructing, financing, maintaining, or operating an underlying nonfinancial asset for a period of time in an exchange or exchange-like transaction. This statement is effective for the year ending June 30, 2023.

The City is evaluating the impact the above GASBs will have on its financial reporting.

Note 2 - Stewardship, Compliance, and Accountability

Budgetary information

The government is subject to the budgetary control requirements of the Uniform Budgeting Act (P.A. 621 of 1978, as amended). Annual budgets are adopted on a basis consistent with accounting principles generally accepted in the United States of America for the General Fund and all Special Revenue Funds. All annual appropriations lapse at fiscal year end.

Prior to June 30, the City Manager submits to the a proposed operating budget for the fiscal year commencing the following July 1. Public hearings are obtained to obtain taxpayer comments and the budget is legally enacted through passage of an ordinance prior to May 1.

City of Standish
Notes to the Financial Statements
June 30, 2020

The budget document presents information by fund, activity, department, and line items. The legal level of budgetary control adopted by the governing body is the activity level. The City Manager is authorized to transfer budgeted amounts between line items within an activity; however, any revisions that alter the total expenditures of an activity must be approved by the .

Amounts encumbered for purchase orders, contracts, etc. are not tracked during the year. Budget appropriations are considered to be spent when goods are received or services rendered.

All expenditures were within appropriations during the fiscal year.

Note 3 - Deposits and Investments

At year end the government's deposits and investments were reported in the financial statements in the following categories:

	Cash and Cash Equivalents	Restricted Cash and Cash Equivalents	Total
Governmental activities	\$ 1,582,750	\$ -	\$ 1,582,750
Business-type activities	637,754	441,037	1,078,791
Total primary government	2,220,504	441,037	2,661,541
Fiduciary funds	41,932	-	41,932
Component unit	265,701	-	265,701
Total	<u>\$ 2,528,137</u>	<u>\$ 441,037</u>	<u>\$ 2,969,174</u>

The breakdown between deposits and investments is as follows:

	Primary Government	Fiduciary Funds	Component Unit	Total
Bank deposits (checking and savings accounts, money markets and certificates of deposit)	\$ 2,661,341	\$ 41,932	\$ 265,701	\$ 2,968,974
Petty cash and cash on hand	200	-	-	200
Total	<u>\$ 2,661,541</u>	<u>\$ 41,932</u>	<u>\$ 265,701</u>	<u>\$ 2,969,174</u>

Interest rate risk – The government has a formal investment policy to manage its exposure to fair value losses from changes in interest rates.

Credit risk – State statutes and the government's investment policy authorize the government to make deposits and invest in the accounts of federally insured banks, credit unions, and savings and loan associations which have an office in Michigan. The local unit is allowed to invest in bonds, securities and other obligations of the United States, or any agency or instrumentality of the United States. United States government or federal agency obligations; repurchase agreements; bankers' acceptance of United States Banks; commercial paper rated within the two highest classifications which mature not more than 270 days after the date of purchase; obligations of the State of Michigan or any of its political subdivisions, which are rated as investment grade; and mutual funds composed of investment vehicles that are legal for direct investment by local units of government in Michigan.

Concentration of credit risk – The government's policy states that no more than 60% of the City's total investment portfolio be invested in a single security type and no more than 80% with a single financial institution.

Custodial credit risk – deposits – In the case of deposits, this is the risk that in the event of bank failure, the government's deposits may not be returned to it. The government does not have a policy for custodial credit risk. As of year-end \$2,475,923 of the City's bank balance of \$2,975,923 was exposed to custodial credit risk because it was uninsured and uncollateralized.

Note 5 - Long-Term Debt

The government issues bonds to provide for the acquisition and construction of major capital projects. General obligation bonds are direct obligations and pledge the full faith and credit of the government. Installment purchase agreements are also general obligations of the government. Other long-term obligations include compensated absences. Compensated absences are typically liquidated with funds from the General Fund, Sewer Fund and Water Fund.

Long-term obligation activity is summarized as follows:

	Amount of Issue	Maturity Date	Interest Rate Ranges	Principal Maturity Ranges	Beginning Balance	Additions	Reductions	Ending Balance	Due Within One Year
Governmental activities									
Bonds and notes payable									
General obligation bonds

Note 6 - Risk Management

The government is exposed to various risks of loss related to property loss, torts, errors and omissions and employee injuries (workers' compensation), as well as medical benefits provided to employees. The government has purchased commercial insurance for all claims. Settled claims relating to the commercial insurance have not exceeded the amount of insurance coverage in any of the past three fiscal years.

City of Standish
Notes to Financial Statements
June 30, 2020

Note 7 - Employee Retirement And Benefit Systems

Defined benefit pension plan

Plan description – The government participates in the Michigan Municipal Employees’ Retirement System (MERS), an agent multiple-employer defined benefit pension plan that covers all employees of the government. The plan was established by the Michigan Legislature under Public Act 135 of 1945 and administered by a nine member Retirement Board. The system provides retirement, disability and death benefits to plan members and their beneficiaries. MERS issues a publicly available financial report that includes financial statements and required supplementary information for the system. That report may be obtained by writing to MERS at 1134 Municipal Way, Lansing, Michigan 48917 or on the web at <http://www.mersofmich.com>.

Benefits provided – Benefits provided include plans with multipliers of 2.5%. Vesting periods range from 6 to 10 years. Normal retirement age is 60 with early retirement at 55 with 15 years of service. Final average compensation is calculated based on 3 years. Member contributions are 0%.

Inactive employees or beneficiaries	
currently receiving benefits	11
Inactive employees entitled to, but not	
yet receiving benefits	1
Active employees	1
	13

Contributions – The employer is required to contribute amounts at least equal to the actuarially determined rate, as established by MERS Retirement Board. The actuarially determined rate is the estimated amount necessary to finance the cost of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. The employer may establish contribution rates to be paid by its covered employees. Employer contributions is a flat amount of \$21,453 each month. The pension plan is closed to new employees.

Net pension liability – The employer’s net pension liability was measured as of December 31, 2019, and the total pension liability used to calculate the net pension liability was determined by an annual actuarial valuation as of that date.

Actuarial assumptions – The total pension liability in the December 31, 2019 annual actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement include: 1) Inflation 2.50%; 2) Salary increases 3.75% in the long-term; 3) Investment rate of return of 7.75%, net of investment expense, including inflation.

Although no specific price inflation assumptions are needed for the valuation, the 3.75% long-term wage inflation assumption would be consistent with a price inflation of 2.50%.

Mortality rates used were based on the 2014 Group Annuity Mortality Table of a 50% male and 50% female blend. For disabled retirees, the regular mortality table is used with a 10-year set forward in ages to reflect the higher expected mortality rates of disabled members.

The actuarial assumptions used in the December 31, 2019 valuation were based on the results of an actuarial experience study completed in 2015.

City of Standish
Notes to Financial Statements
June 30, 2020

The long-term expected rate of return on pension plan investments was determined using a model method in which the best-estimate ranges of expected future real rates of return (expected returns, net of investment and administrative expenses and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates or arithmetic real rates of return for each major asset class included in the target asset allocation as of June 30, 2020 are summarized in the following table:

Asset Class	Target Allocation	Target Allocation		Long-Term	
		Gross Rate of Return	Expected Gross Rate of Return	Inflation Assumption	Expected Real Rate of Return
Global equity	60.0%	8.65%	5.19%	2.50%	3.70%
Global fixed income	20.0%	3.76%	0.75%	2.50%	0.30%
Private investments	20.0%	9.06%	1.81%	2.50%	1.30%

Discount rate – The discount rate used to measure the total pension liability is 8.0%. The projection of cash flows used to determine the discount rate assumes that employer and employee contributions will be made at the rates agreed upon for employees and the actuarially determined rates for employers. Based on these assumptions, the pension plans fiduciary net position was projected to be available to pay all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Changes in net pension liability and related ratios – The following shows the changes in the net pension liability and related ratios as of June 30:

	<u>2020</u>
Total Pension Liability	
Service cost	\$ 4,943
Interest on the total pension liability	202,414
Experience differences	(12,426)
Change in actuarial assumptions	87,349
Benefit payments and refunds	<u>(222,396)</u>
Net change in total pension liability	59,884
Total pension liability - beginning	<u>2,638,898</u>
Total pension liability - ending (a)	<u><u>\$ 2,698,782</u></u>
Plan Fiduciary Net Position	
Employer contributions	\$ 245,712
Pension plan net investment income	237,913
Benefit payments and refunds	(222,396)
Pension plan administrative expense	<u>(4,101)</u>
Net change in plan fiduciary net position	257,128
Plan fiduciary net position - beginning	<u>1,731,301</u>
Plan fiduciary net position - ending (b)	<u><u>1,988,429</u></u>
Net pension liability (a-b)	<u><u>\$ 710,353</u></u>
Plan fiduciary net position as a percentage of total pension liability	73.68%
Covered employee payroll	\$ 35,689
Net pension liability as a percentage of covered employee payroll	1,990.40%

City of Standish
Notes to Financial Statements
June 30, 2020

Sensitivity of the net pension liability to changes in the discount rate – The following presents the net pension liability of the employer, calculated using the discount rate of 8.0%, as well as what the employer’s net pension liability would be using a discount rate that is 1% point lower (7%) or 1% higher (9%) than the current rate.

	1% Decrease	Current Discount Rate	1% Increase
Net pension liability	\$ 956,771	\$ 710,353	\$ 497,801

Pension expense and deferred outflows and inflows of resources – For the year ended June 30, 2020, the employer recognized pension expense of \$97,417. The employer reported deferred outflows and inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources	Total to Amortize
Net difference between projected and actual earning on plan investments	\$ 6,439	\$ -	\$ 6,439
Contributions subsequent to the measurement date*	128,718	-	-
Total	\$ 135,157	\$ -	6,439

*The amount reported as deferred outflows of resources resulting from contributions subsequent to the measurement date will be recognized as a reduction in the net pension liability for the year ending 2021.

Amounts reported as deferred outflows of resources related to pensions will be recognized in pension expense as follows:

	Year ended,	
	2021	\$ (3,746)
	2022	6,385
	2023	23,528
	2024	(19,728)
		\$ 6,439

Defined Contribution Pension Plan

The City of Standish has a defined contribution pension plan for City employees hired after January 1, 2001 through MERS. The City of Standish is the only non-employee contributor to the pension plan.

A defined contribution pension plan provides pension benefits in return for services rendered, provides an individual account for each participant, and specifies how contribution to the individual’s account are to be determined instead of specifying the amount of benefits the individual is to receive. Under a defined contribution pension plan, the benefits a participant will receive depend solely on the amount contributed to a participant’s account, the returns earned on investments of those contributions, and forfeitures of other participants’ benefits that may be allocated to such participant’s account. As established by state statute, all full-time municipal employees of the City must participate in the pension plan from the date they are hired. The City is required to contribute an amount equal to 9% of the employee’s gross earnings. The City’s contributions for the year were \$38,734.

Note 8 – Subsequent Event

As result of the global coronavirus pandemic of 2020, many organizations' financial picture has seen an unanticipated change. The duration and full effects of the outbreak are currently unknown, as the global picture continues to change daily. While management is hopeful that the impact is temporary in nature, a description of known and anticipated circumstances expected to have a significant impact on the City as of the date of management's review is as follows:

Revenues and Liquidity – The City does not foresee significant liquidity issues at this time, however, the effect the pandemic may have on revenues is unknown. It is uncertain if taxable values will be impacted. In addition, future state shared revenues are expected to be lower as a result of fewer sales tax collections.

Accounts Receivable – The City is prepared to see future delays in collection of accounts receivable; however, the extent of any future delays in payment remains uncertain. As of the date of the report, the City has not experienced significant issues.

Additional Expenditures – The City expects to experience increased expenditures during 2021 as a result of covering shifts of symptomatic employees who are unable to report for work, purchasing personal protective equipment and implementing additional safety measures during the pandemic.

Notes: Actuarially determined contribution amounts are calculated as of December 31 each year, which is 6 months prior to the beginning of the fiscal year in which contributions are reported.

Methods and assumptions used to determine contribution rates:

Actuarial cost method	Individual entry-age
Amortization method	Level-dollar closed
Remaining amortization period	18
Asset valuation method	10-year smoothed value of assets
Inflation	3-4%
Salary increases	4.5%
Investment rate of return	7.75%
Retirement age	60
Mortality	2014 Group annuity mortality table of 50% male and 50% female blend

**City of Standish
Component Units
Reconciliation of the Statement of Revenues, Expenditures and Changes in Fund Balances
of Component Units to the Statement of Activities
For the Year Ended June 30, 2020**

Net change in fund balances - Total component units	\$	69,204
<p>Total change in net position reported for component units in the statement of activities is different because:</p> <p>Component units report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense.</p>		
Depreciation expense		(16,759)
<p>Bond proceeds are reported as financing sources in the component units and thus contribute to the change in fund balance. In the statement of net position, however, issuing debt increases long-term liabilities and does not affect the statement of activities. Similarly, repayment of principal is an expenditure in the component units but reduces the liability in the statement of net position.</p>		
Repayments of long-term debt		<u>4,000</u>
Change in net position of component units	\$	<u>56,445</u>

Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance With *Government Auditing Standards*

Independent Auditors' Report

City Council and Management
City of Standish
Standish, Michigan

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of The City of Standish as of and for the year ended June 30, 2020, and the related notes to the financial statements, which collectively comprise The City of Standish's basic financial statements, and have issued our report thereon August 25, 2020.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered City of Standish's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of City of Standish's internal control. Accordingly, we do not express an opinion on the effectiveness of City of Standish's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. *A material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. *A significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether City of Standish's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.
